

IIE Announces: DISSERTATION FELLOWSHIPS IN POPULATION, REPRODUCTIVE HEALTH, AND ECONOMIC DEVELOPMENT*

2009 Program Announcement Africa Call – Request for Proposals

The Institute of International Education (IIE) is now accepting applications for the Dissertation Fellowship in Population, Reproductive Health, and Economic Development. The two-year fellowships of up to \$15,000 per year will be awarded by The William and Flora Hewlett Foundation and IIE. The fellowships are open to students currently enrolled in Ph.D. programs in sub-Saharan Africa. Students in economics, economic demography, geography, and epidemiology are especially encouraged to apply.

These fellowships will support dissertation research on topics that examine how population dynamics and family planning and reproductive health (FP/RH) influence economic development, including economic growth, poverty reduction, and equity. Dissertations that address population and development issues pertinent to the African continent are especially encouraged. The research must include a strong quantitative component, with an emphasis on rigorous data analysis. We encourage the development or use of new statistical methods. Finally, the research must have a strong policy-relevant component, demonstrating an interest in communicating research results with program managers, planners, and policymakers.

The objective of The William and Flora Hewlett Foundation/IIE Dissertation Fellowship is to produce sound evidence on the role of population and reproductive health in economic development that could be incorporated into national and international economic planning and decision making.

RESEARCH OBJECTIVES

The Hewlett/IIE Dissertation Fellowship will stimulate and define an interdisciplinary field of research that crosses the health-economics divide. The primary outcomes in the analysis should be economic. Listed below are examples of specific research questions that could fulfill program objectives. These examples are not intended to be comprehensive.

MICROECONOMIC ANALYSES : How do reproductive health outcomes affect economic outcomes at the individual and household levels? Outcomes of interest could include:

- Labor: productivity, labor force participation.
- Savings: savings behavior of women, children, and households.
- Sectoral investments: for adolescents or adult women.
- Education: investments in male or female education and expected returns.

MACROECONOMIC ANALYSES : How will projected trends in fertility, mortality, and migration affect economic growth and income distribution and the incidence of poverty? Linkages of interest could include:

- Policy variables, such as those influencing labor force participation and savings, and their effect on the relationships among population change, economic growth, and the incidence of poverty.
- Fertility and mortality impacts on growth and poverty.
- National and regional level modeling of how reproductive health investments in sub-Saharan Africa relate to labor supply and savings.

ELIGIBILITY

Students currently enrolled full-time in Ph.D. programs in sub-Saharan Africa are encouraged and eligible to apply. Applications are especially sought from students in economics, economic demography, geography, and epidemiology. Applications from students in other disciplines will be considered if their dissertation research meets the methodological requirements of the program. Students are eligible to apply if they have a dissertation proposal in progress and/or will have completed all coursework by the beginning of the fellowship program.

FELLOWSHIP AWARD

The Hewlett/IIE Dissertation Fellowship in Population, Reproductive Health, and Economic Development will support up to 8 two-year fellowships beginning in 2009, with the start date depending on the academic cycle of the university you are enrolled in. Awards will be announced in the spring of 2009. Fellowship recipients from sub-Saharan Africa are awarded a **maximum of \$15,000 per year (depending on cost of living and university and research expenses in country) for two years** to cover expenses incurred while working on their dissertation, including tuition, travel for research purposes, acquisition of data and research materials, and personal living expenses. (Detailed budgets must be submitted with your application). Fellows will become part of a network of researchers supported by the Hewlett Foundation, PRB, IIE and other funders.

Network activities during the two-year fellowship period will include, an annual research conference in the winter and other optional networking opportunities such as a workshop on advanced methods in population-economic analysis, and a writing workshop.

APPLICATION REQUIREMENTS

The deadline for applying is **March 6, 2009**. Please submit the following:

- Completed application cover sheet (attached).
- Curriculum Vita with full list of educational and other professional activities (maximum of three pages).
- Statement of intent to pursue a dissertation examining the linkages of population-family planning/reproductive health and economic development. Please identify the specific question to be addressed; provide a brief synopsis of the relevant literature demonstrating how your research will contribute to the Fellowship Program's research objective; describe the data you expect to use and how you expect to use it; and summarize expected outcomes (maximum of twenty pages).
- Schedule for completing the dissertation. Please note the dates of your academic calendar.
- Detailed budget for use of the fellowship award.
- Two letters of recommendation. One from your academic adviser and one from another faculty member.
- Essay describing how you believe your work, when complete, will affect policy and improve people's wellbeing (maximum of two pages).

Please submit all application materials electronically (or hard copy to):

Application for Hewlett Foundation Fellowships in Population, Reproductive Health, and Economic Development

2009 – 2011 Application Cover Sheet

Use English to complete the application. Please print clearly.

Applicant Data

Family name (last name)	Given name (first name)	Middle name
Street address	City	
State/Province	Postal (zip) code	Country
Email address (this address must be one that you check regularly)	Telephone number (please include country and city code if applicable)	
Date of birth (Month / Day / Year)	Gender (optional)	
Social Security number (for U.S. applicants only)	Country of Citizenship or permanent residence	
PLEASE CHOOSE ONE OF THE FOLLOWING:		
_____ 1-Enrolled in PhD program in the U.S or Canada	_____ 2-Enrolled in PhD program in sub-Saharan Africa	

Education and Dissertation Topic

Education (Begin with most recent school or university)

University / Location	Degree Obtained: PhD, MA/MS, BA/BS	Department Enrolled / Field of Study	Dates Enrolled:	
			From	To

Title of Dissertation:

Please identify the research question(s) to be addressed:

Describe the data you expect to use (type of dataset) and how you expect to use it (type of study, i.e. longitudinal studies, cross sectional, surveys/interviews, qualitative analysis in addition to primary quantitative analysis, etc.):

Country of Research Focus:

Have you completed all your coursework or will you complete all your coursework by August 2009?

How did you find out about this program?

I certify that these statements are true. I also certify that I am in good health and free from any pre-existing medical condition that could impair the completion of my studies.

Application Checklist

For your application to be considered complete, please ensure that you send the items below.

- Completed Application Cover Sheet.
- Curriculum Vita with full list of educational and other professional activities.
- Statement of intent to pursue a dissertation examining the linkages of population-family planning/reproductive health and economic development; please identify the specific question to be addressed; provide a brief synopsis of the relevant literature demonstrating how your research will contribute to the Fellowship Program's research objective; describe the data you expect to use and how you expect to use it; and summarize expected outcomes (maximum of twenty pages).
- Schedule for completing the dissertation.
- Budget for use of the fellowship award.
- Two letters of recommendation; one from your academic advisor and one from another faculty member.
- Essay describing how you believe your work, when complete, will affect policy and improve people's wellbeing (maximum of two pages).

Your complete application package should be submitted by February 27, 2009 if you are applying from the U.S./Canada and March 6, 2009 if you are applying from sub-Saharan Africa.
